

# Dental Services: Improving Care Coordination

Oral health and dental teams play a critical role in patient's overall care model. As a result, the need for improving communication and awareness for dental teams is essential for improving overall care coordination efforts.

**Use Case:** Use Event Notifications to notify dentists when a patient has received care in the community for dental related complaints or procedures.

## Project Details

- Leverage existing ADT feed to SDHL
- Subscribe to event-based notifications
- Upload specialized patient list

## Impact

- Improved transfer of information and coordination of care between specialists
- Enhances ability to make any changes to treatment plan to provide ongoing support
- Supports ongoing clinical management and scheduling of follow-up visit post-discharge
